Which of these populations have you encountered in the past during your work?

- 
- Individuals who are deaf or hard of hearing
 - Individuals with autism
 - Individuals who with intellectual disabilities

Are there any populations or situations you or your co-workers have encountered where you felt you did not know how to communicate with these individuals? Please describe.

Describe the biggest challenges your department faces in terms of serving individuals with complex communication needs.

- 
- Getting a message across quickly
 - Not understanding directions and/or not complying with directions due to misunderstanding
 - Asking about personal information

FEBRUARY 2019						
Sun	Mon	Tue	Wed	Thu	Fri	Sat
27	28	29	30	31	1	2
3	4	5	6	7	8	9
10	11	12	13	14	15	16
17	18	19	20	21	22	23
24	25	26	27	28	1	2

Please select what best describes how you feel:

	Strongly Disagree	Disagree	Undecided/ Neutral	Agree	Strongly Agree
I know what the letters/acronym AAC represents.					
AAC devices are useful for commenting on something that is happening (e.g., pain rating, pain location)					
I have interacted with a person who uses AAC to communicate					
I feel comfortable holding a social conversation with someone who uses AAC					
I feel comfortable holding a conversation with someone who uses AAC in an emergency situation setting.					
I know some of the different types of AAC					
Only people who cannot speak at all use AAC					
I feel comfortable interacting with someone with a complex communication difficulty
